PROFESSIONAL SUMMARY

Full Stack Developer skilled in the MERN stack (MongoDB, Express.js, React.js, Node.js) and REST API development, with hands-on experience across internships and multiple client and independent projects, including a machine-learning-integrated application and client e-commerce platforms. Strong analytical and problem-solving skills, reflected in a 1,845 LeetCode contest rating (top 6.54% globally) and 180+ DSA problems solved.

Key Skills: MERN Stack, MongoDB, Express.js, React.js, Node.js, JavaScript, TypeScript, REST API Development, JWT Authentication, Git/GitHub, MongoDB Atlas, Mongoose, Machine Learning Integration

TECHNICAL SKILLS

- Languages:** JavaScript, TypeScript, C++, C, Python
- MERN Stack:** MongoDB, Express.js, React.js, Node.js
- Full Stack Development:** MERN Stack Architecture, REST API Development, Server-Side Rendering
- Frontend:** React.js (Vite), React Native, Responsive UI Design
- Backend:** Node.js, Express.js, RESTful API Design for MERN Applications
- Database:** MongoDB, MongoDB Atlas, Mongoose (MERN stack ODM), GeoJSON
- Authentication & Security:** JWT (JSON Web Token), Bcrypt, Google OAuth
- AI / Machine Learning:** Machine Learning, Random Forest, XGBoost, Google Gemini API, ML Model Integration
- Tools & Platforms:** Git, GitHub, Postman, Cloudinary, Multer
- Cloud & Deployment:** Docker, Vercel, Render, Google Cloud

WORK EXPERIENCE

Full Stack Development Trainee (MERN Stack)

Mar 2026 – Apr 2026

Company - Navitech Solutions Pvt. Ltd. (Remote)

- Completed a 45-day Full Stack Development training program building live production features on the MERN stack for real clients.
- Gained hands-on exposure to real-world MERN stack development workflows within a product-based team environment.
- Certified under the Startup India initiative in collaboration with E-Cell, IIT Kharagpur (Certificate No. NTSCS1504).

Full Stack Developer Intern (MERN Stack)

Jun 2025 – Aug 2025

Company - O7 Services (On-site)

- Connected React.js frontend components with Node.js/Express.js backend REST APIs for client-based MERN web applications.
- Streamlined 3 core e-commerce workflows (product listing, cart, and order management), validated through Postman API testing.
- Collaborated directly with clients to gather requirements and deliver functional features.

PROJECTS

1. Kaypee Bakery Website — Client Project, In Progress (2026)

Technologies - React.js, Node.js, Express.js, MongoDB

- Building an end-to-end MERN bakery website with product showcase and ordering features for an active client engagement.
- Integrating WhatsApp-based order communication for real-time order handling.

2. DORA - Area Safety Predictor (August 2025–April 2026)

Technologies - React.js, Leaflet, Node.js, Express.js, MongoDB

- Engineered a location-based safety prediction system with real-time heatmap visualization using GeoJSON and Leaflet.
- Integrated 2 machine learning models (Random Forest and XGBoost) to classify area safety, served via a Node.js/Express REST API.
- Secured 1st Place at Tech Symphonic 2026 (Inter-College Competition).

3. DLS - Duty Leave System, Institutional Project (March 2026 – April 2026)

Technologies - React.js (Vite), Node.js, Express.js, MongoDB, Mongoose, JWT

- Architected a role-based MERN web application serving 3 user roles (students, faculty, and HODs) to submit, review, and approve leave requests.
- Configured JWT authentication with Mongoose schemas enforcing distinct student/admin access levels.
- Proposed for real-world deployment to replace the college's manual leave-approval process.

4. Boutique E-Commerce Platform — Client Project (June 2025 – July 2025)

Technologies - React.js, Node.js, Express.js, MongoDB

- Constructed a MERN application spanning 3 core modules - product catalog, cart, and order management - for a live client.
- Designed REST APIs and MongoDB schemas handling product, cart, and order data flows.
- Delivered functional features for the client through direct requirement gathering and iterative development.

5. Zero to Hero - Waste Management Reward Platform (February 2025)

Technologies - React.js, Node.js, Express.js, MongoDB

- Developed an incentive-driven web application that rewards users for uploading trash images to encourage waste reporting.
- Automated image upload and reward-tracking logic connecting user actions to incentives.
- Integrated Google Gemini API for image verification and waste type categorization.
- Secured 2nd Place at Tech Symphonic 2025 (Inter-College Competition).

6. Flipped - PDF Reader Web Application (Dec 2025 - Jan 2026)

Technologies - React.js, Node.js, PDF.js

- Programmed a web-based PDF reader with a realistic page-flip UI using PDF.js.
- Enabled bookmarking and in-document navigation with optimized rendering performance.

7. Whisper of Arts - Art Marketplace (July 2025)

Technologies - React.js, Node.js, Express.js, MongoDB, Angular.js

- Crafted a platform for users to buy, sell, and bid on artwork, with dynamic artwork listings and user interactions.

8. Quick Read - Web Summarizer Extension

Technologies - JavaScript, Browser Extension APIs

- Built a browser extension that extracts webpage content and generates concise summaries to assist with assignments and reading.

9. Celebration Station - Event Invitation Website (2026)

Technologies - TypeScript, Responsive UI Design

- Devised a custom digital birthday invitation website with a responsive, interactive interface for sharing event details.

10. OceanWaves - Resource Sharing Mobile App (2026 - present)

Technologies - React Native, Node.js, Express.js, MongoDB, REST APIs

- Launched a React Native mobile application for college students to share and access academic resources through a centralized platform, backed by a MERN-based REST API.

11. ItzFizz — Scroll-Driven Hero Animation (March 2026)

Technologies - HTML, CSS, Javascript

Developed a responsive, scroll-driven hero section with animations, synchronized car movement, animated statistics, and smooth scroll interactions.

ACHIEVEMENTS

- 1st Place - Tech Symphonic 2026 (Inter-College Competition)
- 2nd Place - Tech Symphonic 2025 (Inter-College Competition)
- Winner - Syntax Showdown 2025 (Coding Competition)
- Member, Software Development Cell (SDC), LKCTC - created OceanWaves, a cross-platform resource-sharing mobile app
- President - AI Club
- Google Solution Challenge 2026 - AI-based prototype submission
- Received offer letter from AOSC Technologies in 3rd semester after a technical evaluation process
- Certified for Workshop on Intelligent drone systems under NIT Jalandhar

EDUCATION

B.Tech, Computer Science Engineering

2023 – Present

Lyallpur Khalsa College Technical Campus, Jalandhar

- SGPA: 9.0

CERTIFICATIONS

- React Native - Software Development Cell (SDC) (Issued 2024)
- Frontend Development - Software Development Cell (SDC) (Issued 2024)
- Full Stack Development Internship - Microsoft Training Program (Issued 2024)
- MERN Stack - Software Development Cell (SDC) (Issued 2025)
- Deloitte Data Analytics Job Simulation (Issued 2026)
- Deloitte Technology Job Simulation (Issued 2026)
- Intelligent Drone Systems – NIT Jalandhar 2026

VOLUNTEER EXPERIENCE

- Volunteer Front-End Mentor, Local Coding Bootcamp – taught React fundamentals to 30+ students (2024)
- Volunteer for State Level AI Competition as AI Pioneers Club President
